

New Range of Gasing Adaptors and Protective Caps

Austdac has designed cost effective Gasing Adaptors and Protective Disposable Caps to help protect the range of Trolex Sensors and to help with the calibration of sensors.

New Protective Disposable Caps

TX3261

TX6373/83

Hydrophobic Barrier

These new protective disposable caps are now fully sealed with internal 'O' rings to ensure a water seal and an exact fit over the sensor heads. They are fitted with hydrophobic barriers to protect from water and dust penetration, yet allow the gas to penetrate.

The protective caps are designed to fit both the TX6383, (Flammable Sensor), TX6373 (Toxic Sensors range) and the TX3261 older style flammable sensors.

TX6383, TX6373 range Part Number - TX6300X

TX3261 range Part Number - TX3261X

(Note: Remove protective Caps prior to carrying out weekly test, and inspect Cap for ingress of water or dust.)

New Calibration Caps

Brasshead Cal Cap
TX6383/1

The new Calibration Cap is designed specifically for the Remote Brass Flammable Sensor head type TX6383/1. The unit has internal 'O' rings to ensure an exact fit over the sensor. The cap is fitted with a nozzle to allow the calibration gas to be inserted.

Remote Brass Flammable Sensor Head Part Number - TX6383CC

Calibration Cap

Cal Cap
TX6373

TX6383/TX3261

The new Calibration Cap is designed specifically for the Trolex range of both flammable and toxic sensor heads TX6373 and TX6383.

The unit has internal 'O' rings to ensure an exact fit over the sensor.

The cap is fitted with a nozzle to allow the calibration gas to be inserted.

Calibration Cap for the Flammable and Toxic Range of Sensor

TX6383, TX6373 Part Number - TX6383GS

TX3261 Part Number - TX3000A
