

I.S. Fixed Active 1.65 amp Power Supply

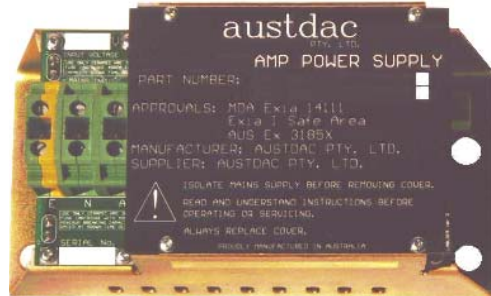

Power
Supplies

General Information

This is a modified 2 amp power supply that has been developed to provide maximum flexibility in system design.

This power supply is available in 110 volt or 240 volt 1.65 amps that uses the existing common housing with the same fixing details and mounting centres, as the previous 2 amp power supply.

They have been designed to provide the maximum current for the specific voltage output. This allows systems to be catered for with the maximum possible number of devices to operate from one power supply.

NSW Approval Number MDA Exib 7044
QLD Certificate Number Ex: 3592X

Typical Uses

The 12 volt 1.65 amp power supply has been widely accepted for use on the roof support system control circuits.

Parameters

- Ex (ia) approved outputs;
- Nominal 110 volt or 240 volt input;
- 12 volt, 1.65 amp output

Dimensions

184mm length x 90mm width x 95mm height

Part Numbers

PSU12110 and PSU12240
